

Our overall aims for this Topic are: To learn about where our food comes from, the impact our food system has on the planet and people and how we can grow and eat more food more locally to reduce CO2 emissions.

Action	Who's in charge?	When will it be done by? (If ongoing, when did it start?)	How can we monitor it?	How will we know when we're successful?	How much will it cost?	Did it work? Any ideas for the future?
To make more areas to plant food and keep animals on the school grounds.						
Get more compost bins and worm boxes at new school.						
Assess and measure what food gets thrown away and find ways to reduce and reuse our food waste.						
Visit local fisheries and farms each year.						
Make more things to eat and drink from the things we grow.						
To learn from the catering staff about where our food comes and develop a local food policy.						
Learn about how some food is better for people and the planet than other food.
